

The goal of this course is NOT to stress you out with crazy exams. Our goal is to help you build a solid understanding of physics concepts through **Self-Directed Learning (Khan Academy)** and **Teamwork**.

In this class, you are not just a student—you are a teacher, too! The passing score is **60 points**. If you bring your best effort, take notes, and help your teammates, you will pass this class easily.

Daily Class Flow (2 hrs for each topic)

Each session covers 8 questions. The teacher demonstrates 2 questions, and the remaining 6 are divided among the three students (2 questions each).

Stage (Advised Time)	Tasks	Points Breakdown
Stage 1: Preparation (30 mins)	• Watch assigned Khan Academy videos. • Take detailed notes on key formulas, concepts, and your own understanding. • Draft solutions for your 2 assigned questions.	40 Points per Session 3 pts per Video Note <i>(Total of 14 videos across all)</i>
Stage 2: Teaching (40 mins)	• Present your 2 questions to the group. • Explain the calculation steps and underlying logic (Do not just read the AI answer). • Copy the notes and solutions presented by peers.	30 Points per Session • 15 pts: Presentation & Logic • 15 pts: Peer notes taken
Stage 3: Exit Quiz (15 mins)	• Complete a quiz based on the questions presented during Stage 2. • Numerical values or scenarios may be modified.	30 Points per Session • Scored based on correct answers
Bonus Points (Applied to final score)	• Teacher Bonus: A teammate correctly answers the question you taught on the Exit Quiz. • Perfect Strike: All three students answer a specific quiz question correctly.	• +3 pts per teammate • +5 pts for the team
